

200 Brownsline

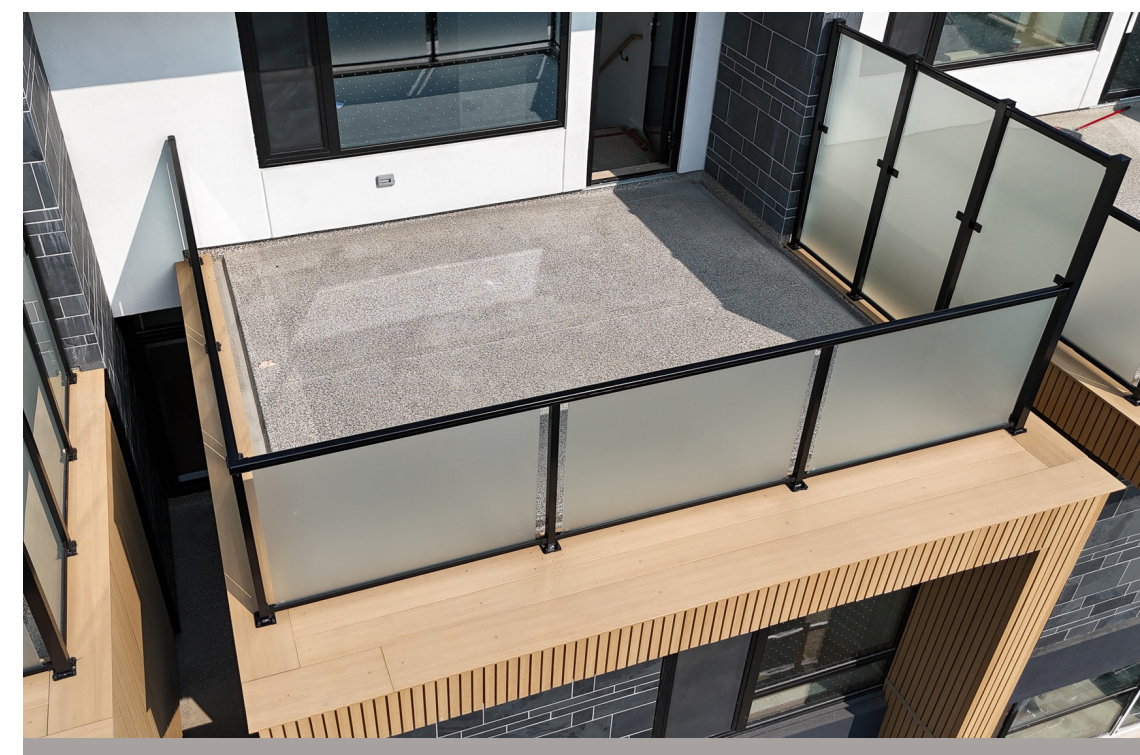

Proposed 4 Units Townhouse

Norfinch Railing had the pleasure of supplying and installing an elegant all-balcony railing system for this lovely townhouse in southern Etobicoke. We chose a continuous handrail design featuring 6mm thick tempered glass panels to enhance both safety and aesthetics.

Considering the vibrant nature of the area, we thoughtfully selected acid-etched glass to provide an effective privacy screen for the railing, ensuring a serene and private outdoor space for the residents.

Our railing systems are lab-tested to meet and exceed local and int'l building codes.

Railing Materials:

- Post - 6005-T6
- All other Aluminum parts 6005-T6
- Glass - Tempered safety Glass
