## Laurier 6 Storey Condominium

Norfinch Railing proudly completed the installation of railings for four distinct sites developed by the Horizon Group in Windsor, Ontario. Among these projects, phase one featured an impressive two-storey condominium that stood out in the area.

For this particular site, we provided and expertly installed our high-quality aluminum picket railing across all individual balconies, ensuring both safety and aesthetic appeal. Additionally, we incorporated glass privacy screens on shared balconies, enhancing the residents' comfort while maintaining an open and modern feel.

In total, we installed approximately 1,500 linear feet of durable aluminum picket railing, combining functionality with exceptional design to elevate the living experience in this new community.
