

# Oakville ON.

Custom Home

Nestled in the heart of central Oakville, this exquisite custom home is situated within a thriving and rapidly evolving community. We had the privilege of supplying and installing stunning 1/2" tempered frameless glass panels that gracefully enhance both the interior and exterior of this remarkable residence. The sleek and modern glasswork is complemented by elegant stainless steel finishes, while beautiful wooden handrails sourced from other artisans add warmth and character to the design. The combination of materials showcases the home's contemporary aesthetic, creating an inviting atmosphere that seamlessly blends elegance with functionality.

Norfinch Railing & Design Inc. service all of the GTA and its surroundings.
